

Innovating for Kenya - One Village at a Time

Support Josphat Kimutai's mission to deliver grassroots innovations like a solar-powered flood early warning system to remote communities across Kenya.

Main Highlights:

- Independent inventor with multiple community-driven solutions
- Currently piloting a solar-powered flood alert system using smart sensors
- Seeking a Suzuki Mirage 650cc (economical and low-maintenance) to travel with tools, prototypes, and awareness materials
- Aims to empower youth, improve resilience, and create local impact

How You Can Help:

- Support with mobility (vehicle donation, discount, or sponsorship)
- Connect to organizations or innovation partners
- Spread the word about grassroots innovation
